

Stop new issues coming in on PRs

The screenshot displays a GitHub pull request interface. At the top, a review by **github-actions** (bot) from 2 weeks ago is shown, with a link to [View reviewed changes](#). The code review highlights a file `src/test/java/org/openrewrite/java/testing/cleanup/RemoveTestPrefixTest.java` as **Outdated** and includes a **Hide resolved** option. The diff shows lines 327-330 with changes to `@Test` and `@Issue` annotations, and a method signature change from `testRemoveTestPrefixWithClashingMethod()` to `removeTestPrefixWithClashingMethod()`.

Below the diff, a **Suggested change** box shows the removal of the old method signature and the addition of the new one. A **Commit suggestion** button is present. A **Contributor** dropdown menu is also visible.

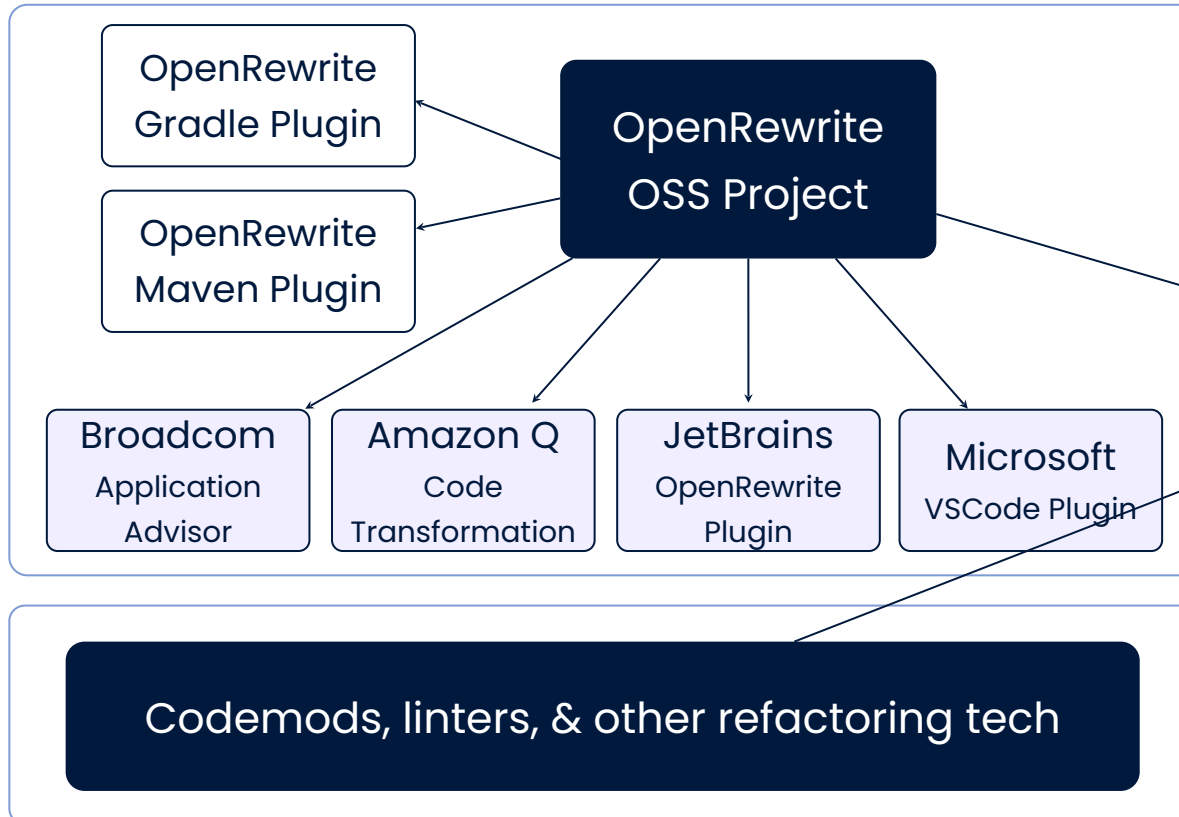

A **Reply...** input field is provided for user interaction. Below it, a button to **Unresolve conversation** is shown, along with a status message: **timtebeek** marked this conversation as resolved.

At the bottom, a commit by **timtebeek** is shown, merged into the `main` branch 2 weeks ago. The commit hash is `30f357c`. A **Verified** badge and a red 'X' icon are visible next to the commit hash. A **View details** button and a **Revert** button are also present.
