

Exercise 2 – Create and run a YAML Recipe

<https://qr.de/qNz7H3>

1. Setup repo
 2. Understand Recipe
 3. Create test
 4. Advance existing Recipe
- Optional: Run against Apache Maven and study.

Refaster Templates

```
@RecipeDescriptor( name = "Replace oldOperation with betterOperation",  
    description = "Replace deprecated 'oldOperation' with surrogate")  
public static class ReplaceOldOperation {  
    @BeforeTemplate  
    public void oldOperation(SomeService s) {  
        s.oldOperation();  
    }  
    @AfterTemplate  
    public void newOperation(SomeService s) {  
        s.betterOperation();  
    }  
}
```
