

Refaster Templates

```
@RecipeDescriptor( name = "Replace oldOperation with betterOperation",  
    description = "Replace deprecated 'oldOperation' with surrogate")  
public static class ReplaceOldOperation {  
    @BeforeTemplate  
    public void oldOperation(SomeService s) {  
        s.oldOperation();  
    }  
    @AfterTemplate  
    public void newOperation(SomeService s) {  
        s.betterOperation();  
    }  
}
```

Exercise 3 – Migrate with Refaster Recipes

<https://qr.de/dSuTPE>

1. Migrate to *String#isEmpty* with Refaster.
2. Advance Test
3. Create Advance Gefaster Recipe

Optional: Run agains Apache Maven and study.
